

Jennifer Haines is a pianist and composer whose melodic solo piano music is peaceful and moving. “Such is the stuff dreams are made of”, says R.J. Lannan of New Age Reporter. Although she hasn't had a formal musical education, Jennifer has been a musician and composer from the start. Even as a toddler, she would sing her own melodies while riding in her car seat.

Mainly self-taught, Jennifer started composing piano music as a creative outlet in 2001 and began recording her compositions to share with family and friends shortly thereafter. It wasn't long before word of her music spread and she decided to start producing albums that she could sell to the growing number of people who wanted to buy them. She has since recorded 5 albums including a collection of Christmas Carol

arrangements and another of traditional hymn arrangements. Her “Thoughts & Dreams” album was nominated for Solo Piano Album of the Year by Whisperings Solo Piano Radio and ranked number 10 on the New Age radio charts as reported by New Age Reporter.

Jennifer credits her music and creativity to God, our ultimate Creator. Her compositions are inspired by the beauty of God's creation, her various life experiences, and her family.

“Pensive, but positive, Jennifer Haines guides the listener down a powerful but slow-moving river of traditional refrains, offering both comfort and contemplation in full measure.”
